Eugenix® Indigenous Believes
Divine Phonetics, Words, Borders, God

1. Purpose.

The purpose of this publication is to explain missed divine phonetic language words and view of Indigenous Language Borders and Indigenous Territorial Borders in the context of indigenous view of Eugenix P.S.A. that was defined in many publications that include the Eugenix® Indigenous Territories - Permanent Protection Plan, Eugenix® Indigenous Believes - Responsibility to Protect, Eugenix® Indigenous Believes - Earth Evolved Cycle of Life, etc.

2. Introduction.

The idea of God that was introduced chronologically from previous ideas of Deus or Theos are interconnected because contrary to what dictionaries define written words are cuts from divine phonetic language of original polar tribe that explored the earth in time precivilizations.

Polar nights are much longer than the nights in equatorial areas of the earth. The length of polar nights allowed the Arcticus Blancus to set eyes and minds on the night sky that began an annual scientific and philosophical quest for all typical questions that even today humans ask. Where do we come from? What are we doing here? Etc.

The term GOD in the old phonetic language of the Arcticus Blancus as its today refers to the early nomenclature of the polar night sky as it changes throughout the polar night. Early indigenous explorers not equipped in cryptography of alphabet that was developed later tried to associate what they observed in the sky to the memorable things of their daily polar life.

3. My Life.

Many phonetic words in today alphabetic cryptographic language thru historical associations are commonly used to define not what they originally meant. In addition, many very old religions that translate own world views into alphabetic language do so using alphabetic words that have not been define correctly. Once gain it must be reminded that words are not dead letters but living molecules of composed of phonetic psychological meaning that can repair and disrupt human life on electromagnetic level instantly as many chemical medicines and chemical weapons do using chemical molecule properties.

Words such as GOD and entire pallet of interconnected meanings have not been defined in a very long time as the Arcticus Blancus indigenous phonetic language can only be redefined when the misunderstood inter-human connections realize it and seek to correct it. Since the world climate was not as bad as it is today, the world did not connect in a way that would allow me the Anthropological Morphologic Etymologic Naturalist Krzysztof Ireneusz Pawlak from the Arcticus Blancus polar hair tribes to refine it once again.

I was not born with the comparative knowledge of phonetic language as the defined in books language has a stronger life influence on humans as the indigenous phonetic language that reaches the roots of creation – simply explaining the today economy runs the world and sponsors meanings and dictionaries for thousands of years. If a writer lets says from 5000 years ago missed to define an important phonetic verb or noun the world of today is just not aware of it.

Everything I know and I share is not of my own will but because I was born to suffer so I can realize that all modern ideas and religions have failed because the indigenous life and language was interfered with and therefore what we have today is greed and destruction, not a climate repair and life beyond. One important indigenous fact was missed by main religions, that have not been missed much by science is that Earth and all of its biological organisms are living, feeling and thinking intelligent beings that have co-evolved with us under mutual agreement to care for each other – so we can live as defined in the Eugenix® Indigenous Believes - Earth Evolved Cycle of Life.

Please visit www.eugenix.org website and read the last section of the website titled Etymology of Words. This section attempts to reconstruct and transcribe words recorded in dictionaries that have been detached from the natural phonetic language of the body. The meanings of words that existed only phonetically before the introduction of the alphabet are omitted by dictionaries, resulting in poorly described, incomplete, and misunderstood words, resulting in poor use of their historical phonetic meanings that cause the mental illness as present in all social medias and news channels. Indigenous languages are protected under UN Resolution A/Res/47/135, so I am hoping to find budget to publish some of the words that I began to dissect to add historical phonetic meaning context.

4. Missing Word of God

Many philosophies were developed throughout time using the polar phonetic language of Arcticus Blancus that formed the basis for today's earth's borders, e.g. Republics, Imperium's, Kingdom's, and Democracies. None of them however to my knowledge are based on the principals of the human indigenous origin and symbiosed attachment used by Eugenix P.S.A.

The climatic borders that have been defined by Eugenix P.S.A. in the Eugenix® Indigenous Territories - Permanent Protection Plan have been defined because of divine calling of indigenous nature that have been oppressed for the last 5000+ years. Our phonetic language has been used and abused by many foreign religions of foreign indigenous groups so the solutions to our problems have been stolen by those that have tried to explain to us our native and indigenous phonetic language using foreign religion and foreign translated scripts.

Word apple for example to a dictionary is a noun that represent some fruit on the tree, but phonetically alive term “apple” provides us with information that relate to the living history of the word such as that apple is from “upp” place and that it fall to down “pole” after it “po” meaning it gets big and heavy. The phonetic language is critical and primary in development of correct indigenous philosophy and psychology oriented in sustainment and health of own indigenous group and earth climate and interconnected biological organisms. Like many foreign sources for psychological and other beneficial purposes, phonetic language cryptography is divided, so the integral lives are not disrupted. Our lives have been colonized and disrupted by foreign religions, philosophy and sexual genocide.

Discovering the GOD as the Galactic Orbiting Dimensions that helped the polar tribe to form ancestral phonetic language before first civilization existed works thru us for the benefit of Earth as this GOD – Milky Way Galaxy the only SON – System of Nature a living Earth that creates all that GOD has provided in this part of the galaxy.

Every predator and plant on earth has designated indigenous territories to live and rule. Humans that developed “all business no care” philosophy have misunderstood the real meaning of business and economy – a structure developed to help solve issues by tools and automation to solve separate climate responsibilities and obligations. So, the concept of God in all that have misunderstood the purpose of life on earth will be force and power that builds up to destroy – when following Wrong plan and destroys to build up – when following Gods plan.

Defining tribal borders for three indigenous climatic phenotypes as well as acknowledgement of distinct climatic groups by today's date is very late and even too late to be established easy. The Arcletic territories that equal to 33.33(3) % of Earth (85,000,000 km2 of the northern polar area and 85,000,000 km2 of the southern polar area) originally occupied and symbiosed only to Arcticus Blancus polar hair tribal group due to missed defined divine phonetic connections have caused many non-indigenous groups to move to Arcletic territories to habiate them – God wants all subpolar indigenous groups, co-indigenous groups and non-indigenous groups defined in Eugenix Ethnic Hair Classification as A1 to D7 to return all occupied Arcletic territories to the state of nature thru ecological management and ecological transition of all present industries and installations to be ever less damaging to nature, less present and less occupied by those groups and their destructive activities. Arcletic territories thru responsible management must be returned to Arcticus Blancus indigenous control as Eugenix P.S.A. finally established the plan of climate repair and temporary lesser borders.

5. Eugenix Borders.

Eugenix P.S.A. as a small Arcticus Blancus indigenous polar hair company focused only on the upper Arcletic territories, climate repair programs related to the Antarctic Ice Removal Program and Geomagnetic Dams Constructions with limited budget and psychological power cannot define specific instructions directly to all individual states that currently are formed in the Arcletic territories equal to 170,000,000 km2. Eugenix Borders as defined in the Eugenix® Indigenous Territories - Permanent

Protection Plan are the borders that allow all present on them climate symbiosed indigenous groups to be responsible for the territories in which they are biologically suited and historically they had damaged the most.

6. Conclusion

The financing of free Indigenous heritage-protection mechanisms—such as the Eugenix® P.S.A. Indigenous Heritage Protection Program, which safeguards Arcticus Blancus communities from inter-Indigenous sexual genocide and ensures the continuity of Indigenous ecological leadership—must be secured through taxation on the occupation of Arcticus Blancus Arcletic territories by all non-Indigenous, co-Indigenous, and subpolar Indigenous groups and individuals. These taxes must be regulated with the same rigor as the import-export taxes collected by states, ensuring that sufficient funds are allocated to healthcare systems serving multi-Indigenous persons and groups who experience lifelong disorders, discomforts, and conditions requiring continuous, publicly financed support. Such financing is essential to limit hardship, sustain symbiosed life, and uphold the principles of God and the United Nations Declaration on the Rights of Indigenous Peoples (2007).

Sincerely,

K Pawlak
